

The Honorable David Porter  
Chairman of the Railroad Commission of Texas  
Texas Railroad Commission  
P.O. Box 12967  
Austin, TX 78711-2967

**RE: Support for Texana Groundwater Conservation District's Groundwater Monitoring Plan Recommendations for Hilcorp Energy Company's Carbon Dioxide Sequestration and Enhanced Oil Recovery Project at the West Ranch, Jackson County.**

Dear Chairman Porter:

As a resident of Jackson County, I welcome the economic contribution to our community made by the Hilcorp Energy/NRG oil project near Vanderbilt. This project should provide jobs and increase the tax base in our county.

Still, I am concerned that Hilcorp Energy and partners are not doing enough to protect our drinking water from potential contamination. The project uses carbon dioxide to mine oil, possibly generating toxic wastewater that could migrate into the surrounding groundwater through the many oil and unplugged oil wells near Vanderbilt and the West Ranch.

I am asking you to actively support the efforts of the Texana Groundwater Conservation District to have Hilcorp and partners implement a more stringent monitoring program that is scientifically based, funded by the project partners, and carried out by an independent third party.

Thank you for your service and your attention to this matter.

The Honorable Phil Stephenson  
Commissioner's Court of the County of Jackson  
115 W Main Street, Room 207,  
Edna, Texas 77957

**RE: Support for Texana Groundwater Conservation District's Groundwater Monitoring Plan Recommendations for Hilcorp Energy Company's Carbon Dioxide Sequestration and Enhanced Oil Recovery Project at the West Ranch, Jackson County.**

Dear Judge Simons, Commissioner Hunt, Commissioner Bubela, Commissioner Bilicek, and Commissioner Karl:

As a resident of Jackson County, I welcome the economic contribution to our community made by the Hilcorp Energy/NRG oil project near Vanderbilt. This project should provide jobs and increase the tax base in our county.

Still, I am concerned that Hilcorp Energy and partners are not doing enough to protect our drinking water from potential contamination. The project uses carbon dioxide to mine oil, possibly generating toxic wastewater that could migrate into the surrounding groundwater through the many oil and unplugged oil wells near Vanderbilt and the West Ranch.

I am asking you, as the Commissioner's Court, to actively support the efforts of the Texana Groundwater Conservation District to have Hilcorp and partners implement a more stringent monitoring program that is scientifically based, funded by the project partners, and carried out by an independent third party.

Thank you for your service and your attention to this matter.
